

# QUICK 42

LEAN Design Based Platform  
for cosmetic and structural repairs

# QUICK Benefits for your Bottom Line

## Sustainable solutions that add value

We are continually developing world-class collision repair solutions that stand the tests of time. By minimizing or eliminating a Body Shop's down time during the vehicle body repair process, removing extra steps and vehicle transfers, we contribute to long term sustainability and value for our customers. We work in close cooperation together with OEM vehicle manufacturers, body shops and the insurance industry to develop products that meet and exceed the needs of the collision repair industry. We take the lead as a responsible leader in development of the latest technological solutions that keep pace with today's vehicle models. We continually manufacture products that will add value today and well into the future.

## Capability that maximizes Productivity

Today it is necessary to eliminate waste by utilizing limited shop space in the leanest way possible to sustain a profitable business model. With QUICK42 your shop can quickly create free space with its optional mobility design without compromising strength or quality. Today's body shops also require universal repair systems that are flexible and capable of

handling all levels of vehicle repair damage while meeting the targeted vehicle return date to the customer

## Designed for cosmetic and structural damage repairs

QUICK42's platform is compatible with Car-O-Tronic Vision X3 or Classic Measurement Systems, and EVO1-3 Universal Anchoring and Holding System to repair all vehicle makes accurately.

## Reduce repair process time

With QUICK42 QUICK set-up and anchoring, vehicle measurements can be taken on the wheels or in clamped position. Ease of access to the work areas on the vehicle are easily obtained with the adjustable platform work height and lightweight removable ramp sections while shortening the vehicle repair time. Cosmetic repairs can be quickly performed while the vehicle is supported on its wheel and if you discover additional damage that is structural in nature you can start the repair work immediately by anchoring the vehicle without changing platforms. That's efficiency.

**QUICK 42 will increase your profitability**

With the majority of collision repairs performed today only require cosmetic repairs the LEAN design of QUICK42 is capable of processing higher volumes of cosmetic and structural repairs in less time. The QUICK42 Repair System not only shortens your repair cycle times it also assures accurate quality repairs. Benefits that will surely increase your profits, and your satisfaction level.

**Quick and efficient** Structural diagnosis while vehicle is supported on it's wheels or in a clamped position.

**Quick and secure clamping** directly when the vehicle is on its wheels or in a clamped loaded position.

**Easy to handle;** multifunctional power unit and central satellite locations for hydraulics and air hook ups.

**User-friendly hand control** with all-in-one controls for automatic tilting, lifting, pulling and hydraulic pillar jacks.

**Effective holding and clamping** Does not require dedicated vehicle specific fixtures when using EVO1-3 for holding, anchoring and fixturing

# Designed to meet future OEM-demands

## Premium Quality Characteristics

By premium quality, we not only mean the engineered quality of the product, we like to think of it as the selection of raw materials and the structural functionality of the QUICK42's design. Quality value-added functions that make the technicians work process easier, faster and quite simply ergonomically better..

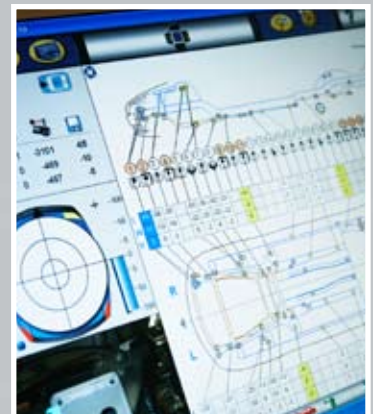

**Easy access;** lightweight multi-purpose ramps, for wide and narrow wheelbases.

**Timesaving and ergonomic** Allows access to the damage areas of the vehicle, anchoring points, and adjustable platforms to reach upper body areas

**Quality assured repairs** with accurate measuring in real time through the entire repair process by Car-O-Tronic.

**Precise information and documentation** with the world leading database providing accurate information from diagnosis to final documentation.

# QUICK42 Design Based Platform for leading body shops

## A platform for increasing profits

The price is what you pay. The value is what you get out of our products. Our collision repair knowledge creates long term profits along with quality assured repairs. The value we create is the significant difference not only for the collision repair center but most importantly the customer!

## Take full advantage of QUICK 42

QUICK42 raises the bar on excellence by setting new standards for universal repair systems by performing at higher levels both on the shop floor and

in the profit accounts. Take it a step further utilizing EVO1-3 for anchoring and part holding combined with Car-O-Tronic Vision X3 Measurement System. EVO is an universal system that lowers the operating costs since there is no need for extra dedicated fixtures or waiting on expensive rentals. Car-O-Tronic offers precise vehicle information and real-time control during the entire repair process. With QUICK42, EVO and Car-O-Tronic there is no better possible solution for rapid results and premium quality diagnostics.

# Value-added solutions

## Sustainable and long-term value

Our objective is to deliver sustainable and long-term valuable solutions for you the customer. To achieve our mission, it's essential to see the big picture and develop integrated systems that contribute to an effective, high-quality work process from diagnosis, repair process, final inspection and documentation. A value-added solution that renders increased profitability period.

Platforms that increase productivity and profitability within our welding systems & induction heaters

Assured quality control in real time with Car-O-Tronic Measurement System

EVO System for holding, anchoring and fixturing designed for the lowest possible operating costs

24 hour accessibility to New Vehicle Information

High efficiency with welding systems & induction

Workspace Solutions that facilitate LEAN Operations

Knowledge is power, supplied by the Academy

Customer Service Globally

**Value-added solutions for leading collision repair centers**

Our fundamental philosophy for value-based solutions is to start with our customer's needs and requirements, evaluate the big picture and contribute to an effective high-quality repair process – from diagnosis, repair, final inspection and documentation. By increasing quality and productivity while simultaneously minimizing down time, unnecessary work and vehicle transfers.

We have been in the business for 40 years, and are still the leading global company in the collision repair sector with over 40 000 systems delivered to customers in over 70 countries. CAR-O-LINER will continue to contribute to the development of sustainable long-term value added solutions that render productivity and profitability to our customers our most important assets.
